

Caterpillar Diesel Engines

C11 11.1L Heavy-Duty Engine

CAT C 11 Specifications

Cylinders	In-Line 6
Bore/Stroke	5.12 x 5.51 (130mm x 140mm)
Displacement	11.1 L (677 cu in)
Weight	2270 lb (1030 kg)
Horsepower	305 to 370 @ 2100 rpm
Torque	1050-1450 lb-ft @ 1200 rpm

- Excellent fuel economy from variable valve actuation and Cat® MEUI fuel system
- Improved head gasket design and Cat exclusive "leak-free" technology provide increased reliability.
- Durability is enhanced from new connecting rod, piston, cylinder head and water pump designs.
- The C11 on-highway engine replaces the C-10 engine and provides increased displacement and resulting longer engine life. The C11 features a cross-flow head design complete with series turbochargers and variable valve actuation. An optional Cat compression brake are available to fit your specific application. Heavy duty components, scaled from the C13 result in a highly reliable, durable power plant. A unique combination of heavy duty components, in a lightweight package make the new C11 a perfect engine for both day cab and vocational applications.
